Personal Website : <https://fauzantaslim.my.id>

Informatics Engineering student with hands-on experience as a Backend Developer, focusing on building REST APIs and designing scalable systems. Experienced in developing a Hospital Asset Management System, including implementing business logic, database design, and system integrations. In addition, I have practical experience in software testing by creating test scenarios, writing test cases, and performing API testing using tools such as Postman. Highly interested in Software Quality Assurance and eager to grow as a QA Engineer with a strong understanding of backend systems. I am a fast learner, so I will easily adapt to new applications and working environments.

Work Experience

RS UMMI Bogor - Backend Developer Internship

Bogor

Feb 2025 - Jul 2025

- Developed a backend service (REST API) for a Hospital Asset Management System to track, manage, and monitor medical and non-medical assets across multiple locations, and designed the database schema consisting of 45+ tables to support the entire asset management workflow
- Built core business modules including asset lifecycle management, procurement workflow, inventory auditing (stock opname), and asset depreciation tracking
- Implemented user authentication, role-based access control, and security configurations to ensure data protection and access management
- Created and executed test scenarios and test cases for each module, and wrote automated integration tests to ensure system reliability and minimize production bugs
- Integrated third-party services including push notifications (WhatsApp), QR code generation, API documentation, and Excel-based reporting to support daily operational needs

Robinson Mart, Mall BTM - Staff Warehouse Intern

Bogor

Mar 2021 - May 2021

- Managed daily inventory operations including stock receiving, storage, and processing to ensure timely product availability on the sales floor
- Handled product return processes using Warehouse Management System (WMS), ensuring accurate data entry and stock reconciliation
- Assisted in optimizing storage layouts to improve picking efficiency and maximize warehouse space utilization
- Collaborated with warehouse and store teams to maintain seamless workflows, minimize stock discrepancies, and support smooth daily operations

Education

Binaniaga Indonesia University

Oct 2022 - Present

- Majoring in Informatics Engineering
- Current GPA 3.70/4.00
- Certificates <https://shorturl.at/MK9Iq>

SMK PGRI 04 BOGOR

Jul 2019 – Jun 2022

- Majoring in Teknik Komputer dan Jaringan (TKJ), Final Score 80/100

Skills

- Javascript
- Typescript
- Express Js
- PHP
- Laravel
- Postman
- Playwright
- Cucumber
- Bug Reporting
- GIT
- SQL
- Docker
